LeanKit Presenting Forecasting and Risk Management Overview in “Lightning Talk” at Agile Day 2013

NEW YORK, September 18, 2013 — A member of [LeanKit's](#) executive team will be giving a “lightning talk” on its innovative Forecasting and Risk Management tool during the Agile Day 2013 timeframe. The short talk is designed to give a quick snapshot of a topic to the audience, and offers LeanKit the opportunity to showcase its visual management platform. In addition, LeanKit will show how the tool allows users to automatically harvest historical project data to accurately predict delivery dates for future projects, rather than relying on inaccurate estimates. The tool goes one step further to identify specific bottlenecks that impede progress, and specific roles required to complete projects in a shorter amount of time. As a result, teams aren't constantly struggling to meet unrealistic deadlines.

The information gleaned from the tool can also be shared with a variety of stakeholders from team members to senior executives, helping to set expectations that are rooted in actual data. Additionally, the tool allows for tracking a project's status in real time, ensuring maximum value on a project investment.

WHO: David Walker, vice president, product marketing at LeanKit

WHEN: September 18, 2013

WHERE: New York City

WHAT: Leveraging a Forecasting and Risk Management tool on LeanKit's visual management platform to showcase insights with historical data for better business planning.

About LeanKit

LeanKit is recognized by the Agile and Lean community as the most flexible and powerful tool available for implementing visual project management based on Kanban systems. The company is also making a name for itself beyond IT with customers who use their tool to manage and collaborate on projects in fields as diverse as engineering, manufacturing, marketing, customer service, technical support, etc.

Since its founding in 2009, LeanKit has grown rapidly to serve more than 170,000 users around the world at companies such as Adobe, Siemens, NBC Universal, HP, GlaxoSmithKline and Spotify. For more information, visit www.LeanKit.com.
