

Lean Leadership, Culture and Tools

Introducing Chris Hefley, CEO of LeanKit

What is your experience with Lean?

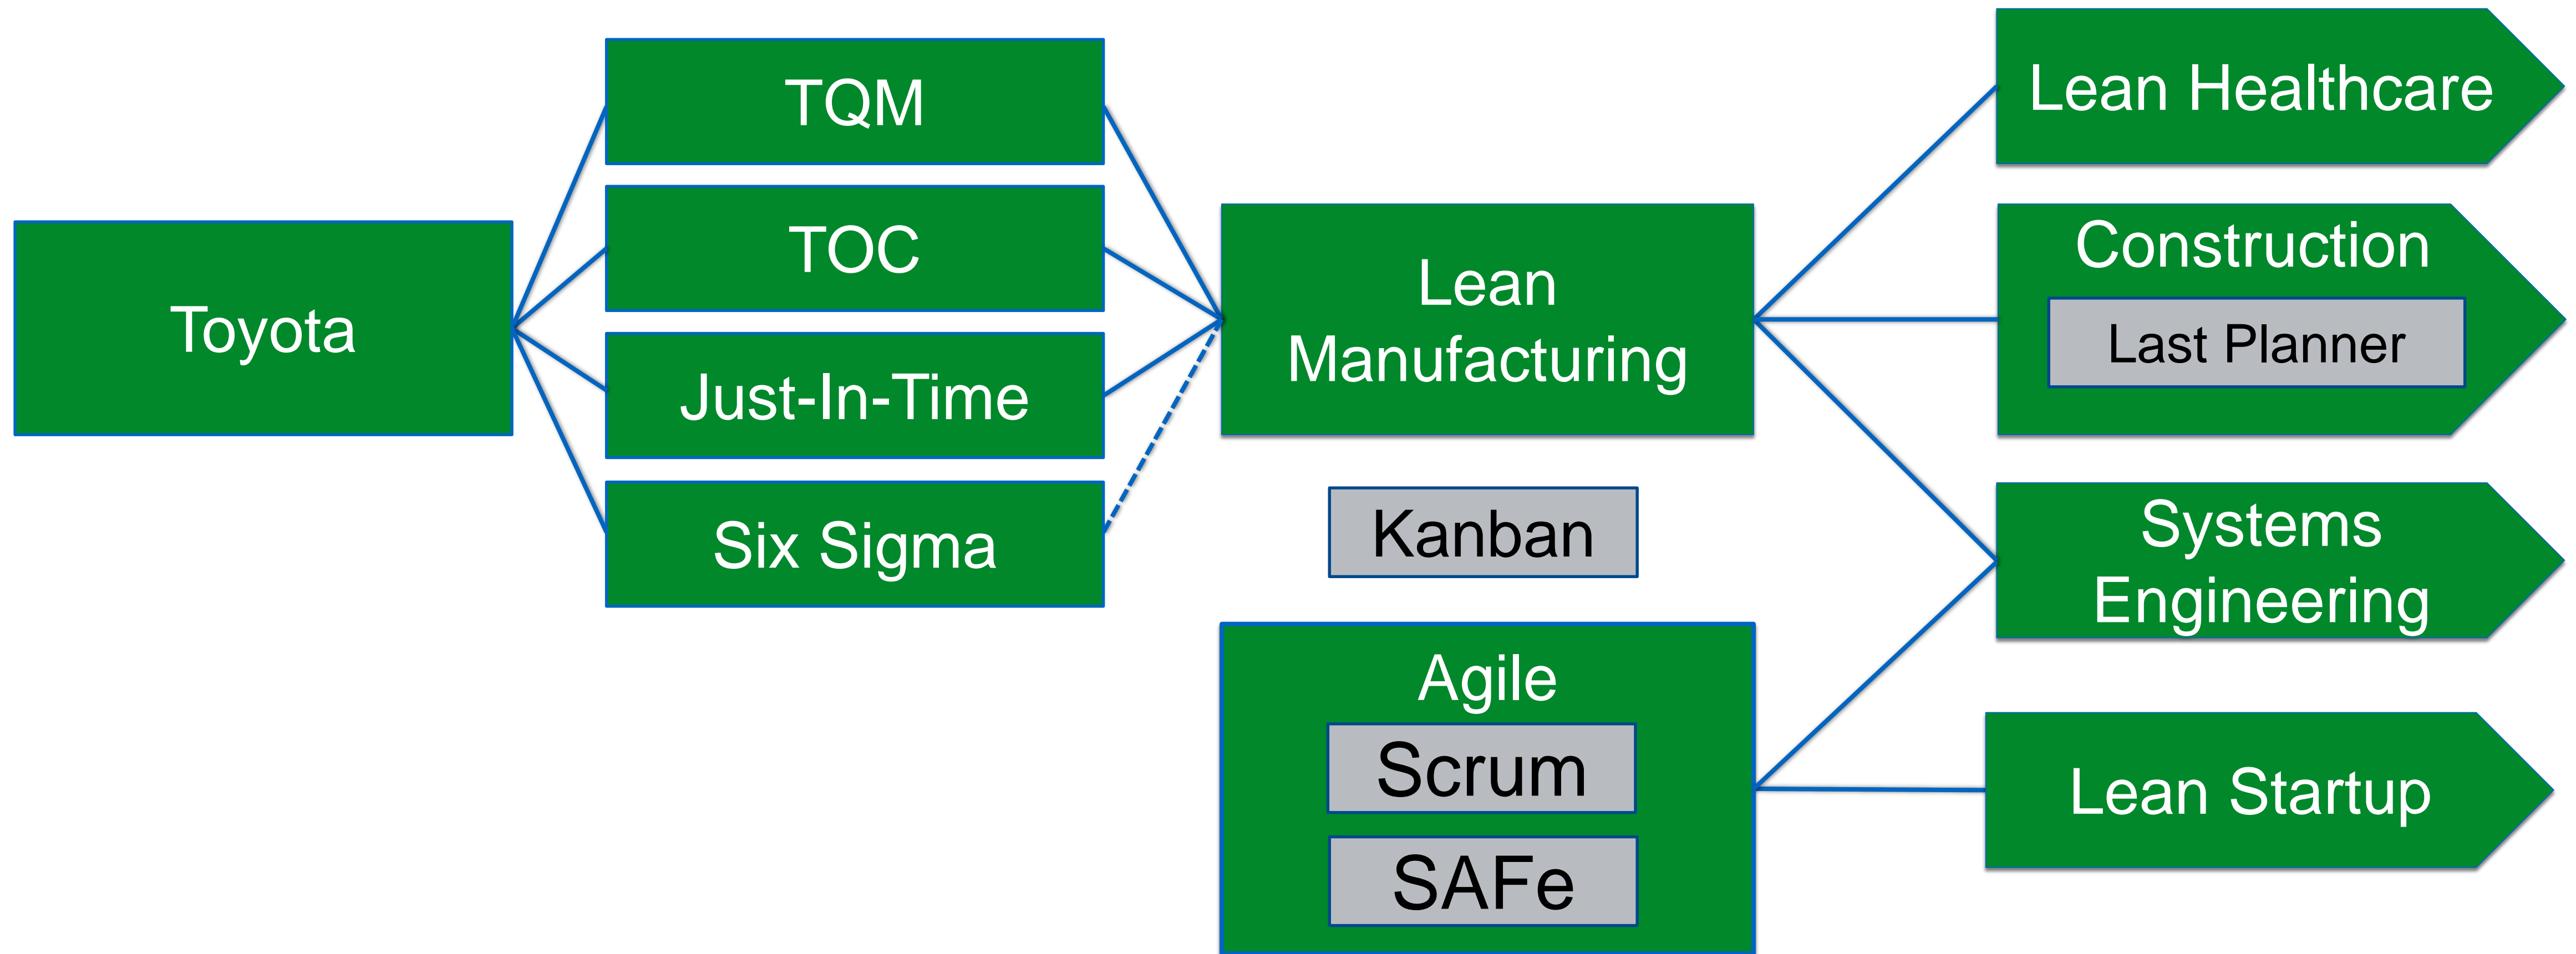

Poll Questions

- Which role do you most closely identify with?
- How long have you been practicing Lean?
- What are the greatest barriers to adopting Lean in your organization?

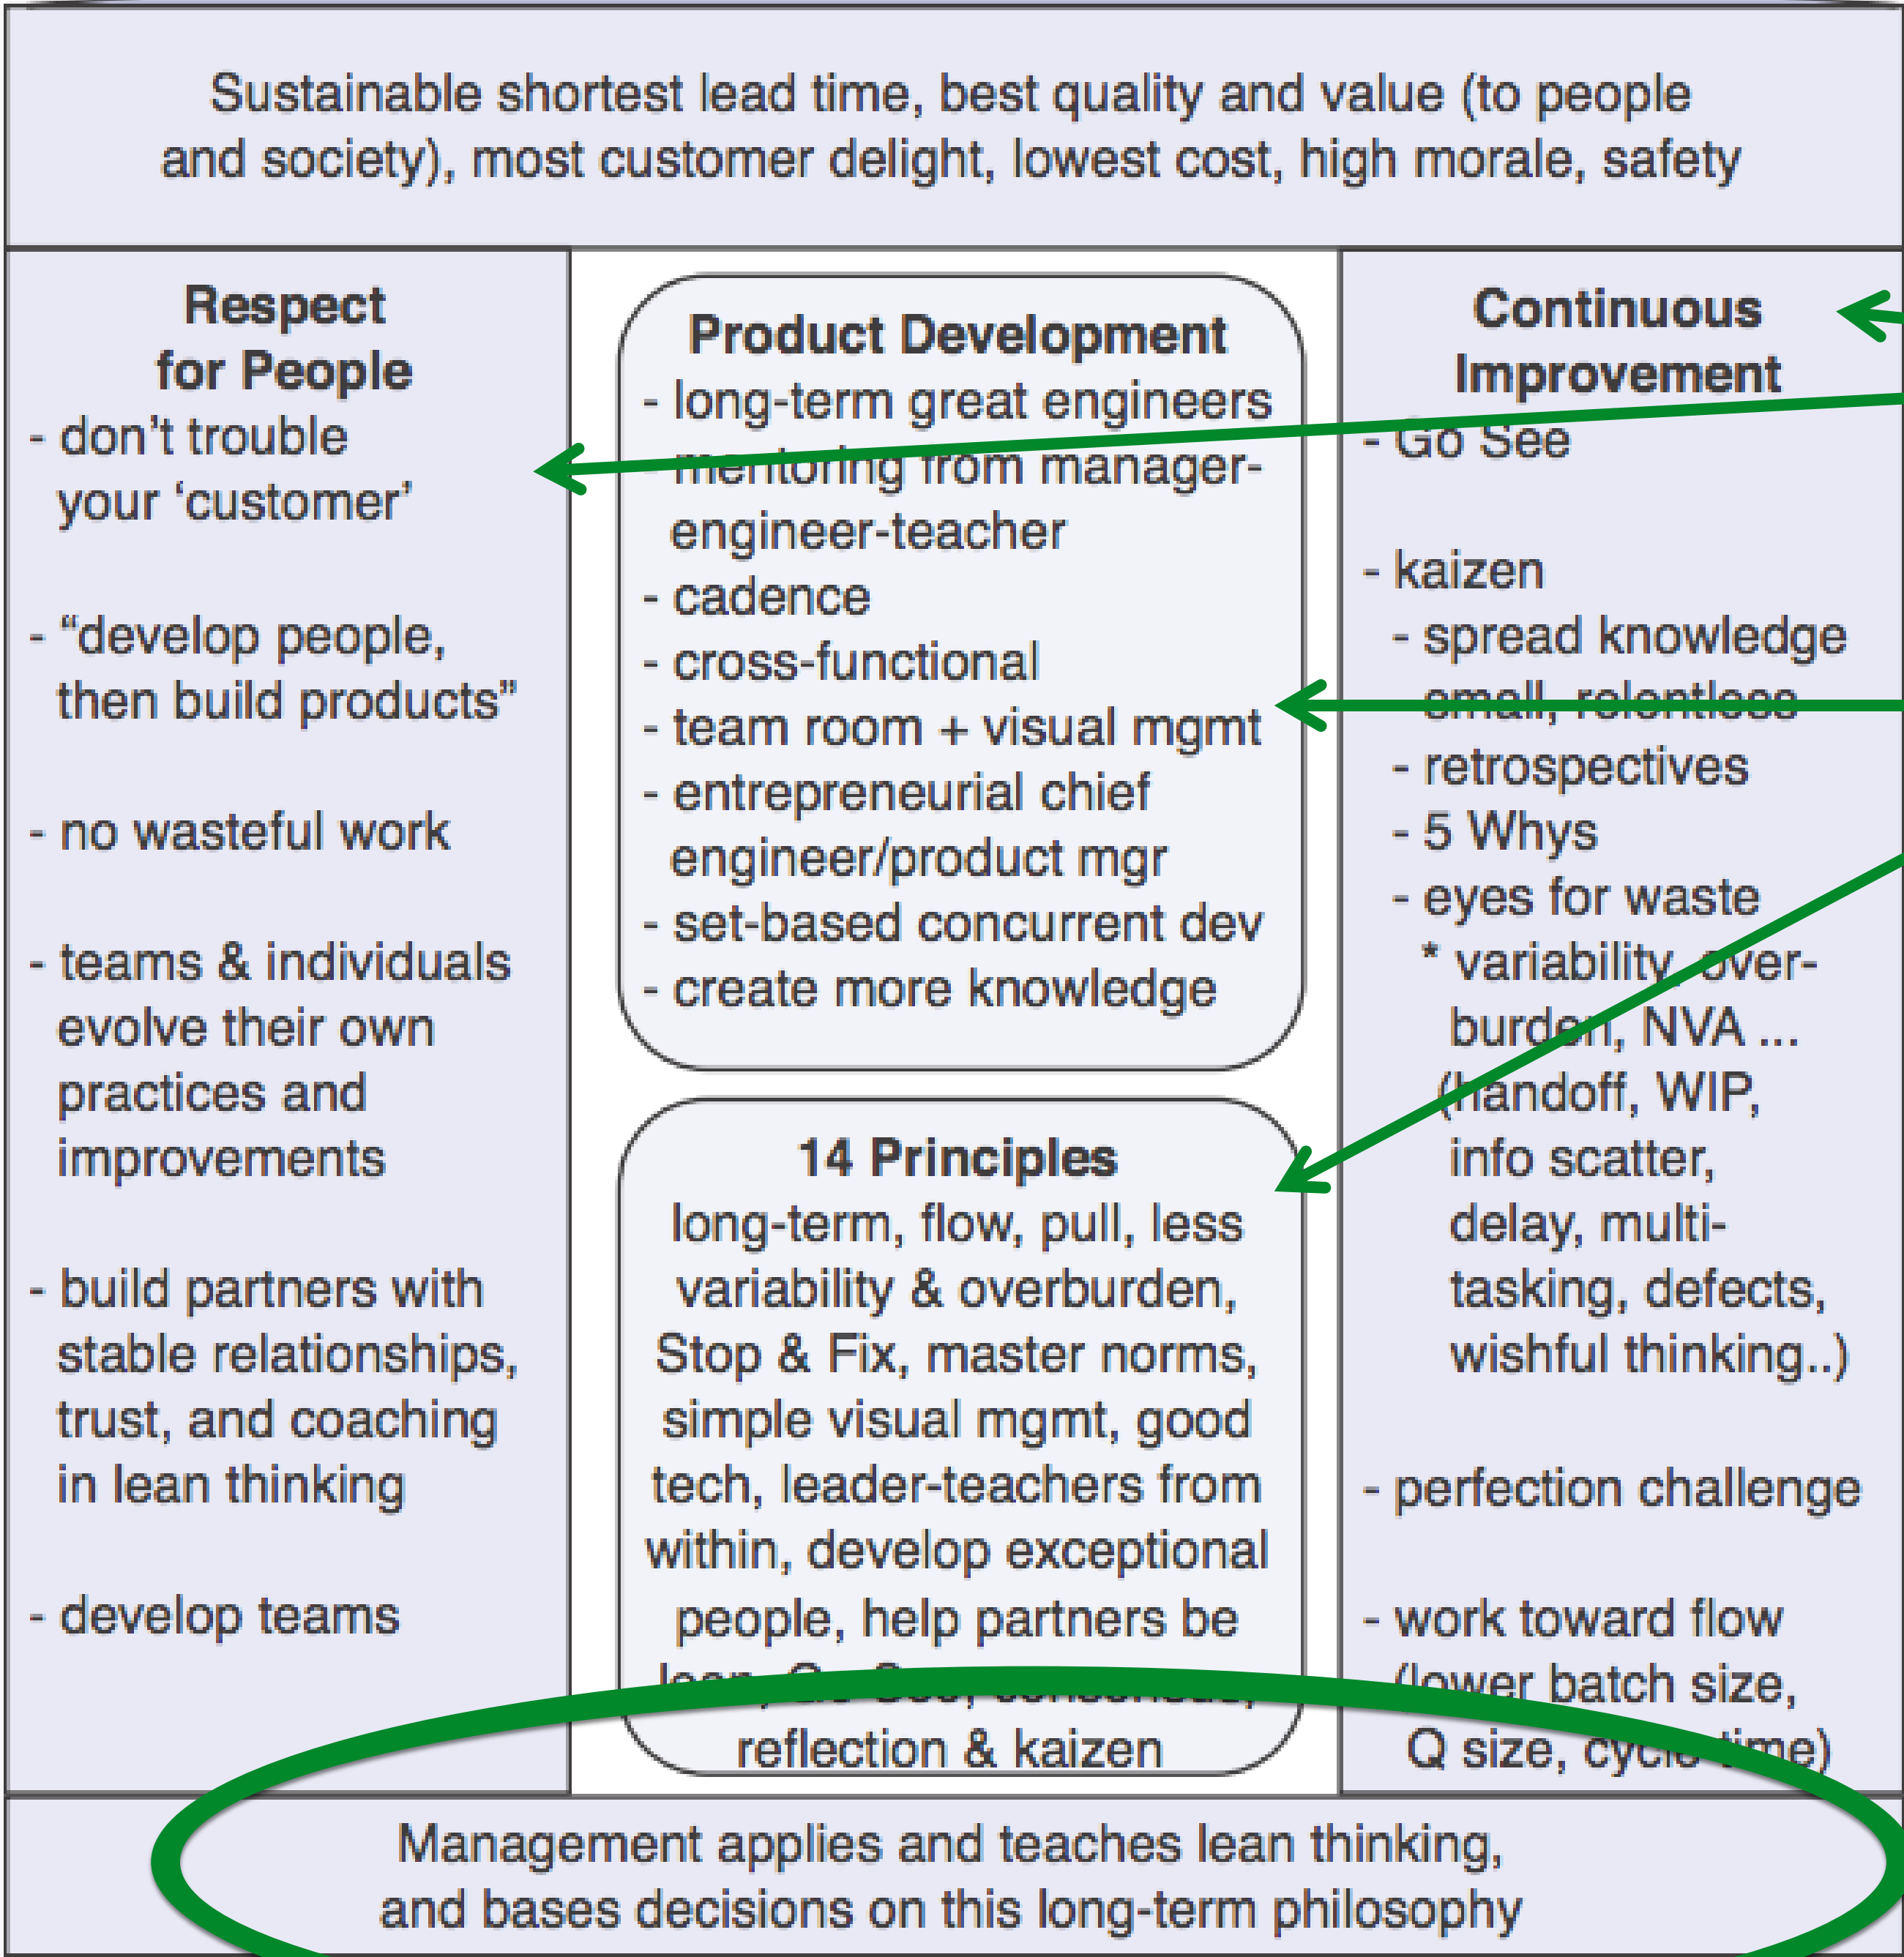

Lean Leadership Culture, and Tools

- Without Leadership, scalable and sustainable Lean/Agile is impossible
- Leadership's responsibility is to change the culture, by teaching Lean Thinking
- Lean Tools (Lean *Thinking* Tools) are essential for changing the culture

Lean – A multi-industry trend

Focus on flow / feedback vs. “efficiency”

The Goal of Lean

Pillars of Lean

Principles, Values, and Tools

The House of Lean

Built on a foundation of Leadership

Lean = Lean Thinking

Lean Tools = Thinking Tools

Lean Thinking Tools

- “5 Whys”
- PDSA (Plan-Do-Study-Act)
- A3

Agile Thinking Tools

- Planning Poker
- Story Mapping

LeanKit's Lean Thinking Tools

- FSGD
- TLDR
- Fat Robin Scheduling
- 0.5x Thinking

ROUND ROBIN SCHEDULING

PROCESSES	BURST TIME
P1	6 42
P2	5 31
P3	2
P4	3 1
P5	7 5

Given Time Quantum
2 units

Gantt Chart :

NOTE : Assume that all the Processes arrives at t = 0

Fat Robin Scheduling

This doesn't Fizz so Good anymore...

Stop Digging

DIY Lean Tools

- As you learn Lean Thinking, you can (and should) create your own Lean (Thinking) Tools
- Borrow and Customize Models and Tools from wherever you find them
- “Improve Collaboratively, using models and the scientific method”
 - David J. Anderson (the Kanban Method)
- Brand them as your own
- What’s your organization’s “FSGD”?

DevOps

- What is DevOps?
- Another Thinking Tool (not just tech)
- The goal of DevOps: Continuous Delivery, High Quality and Safety
- Corresponds to several classical Lean Thinking Tools, including
 - Error-Proofing (Poka-Yoke)
 - Autonomation (Jidoka)

Poka Yoke

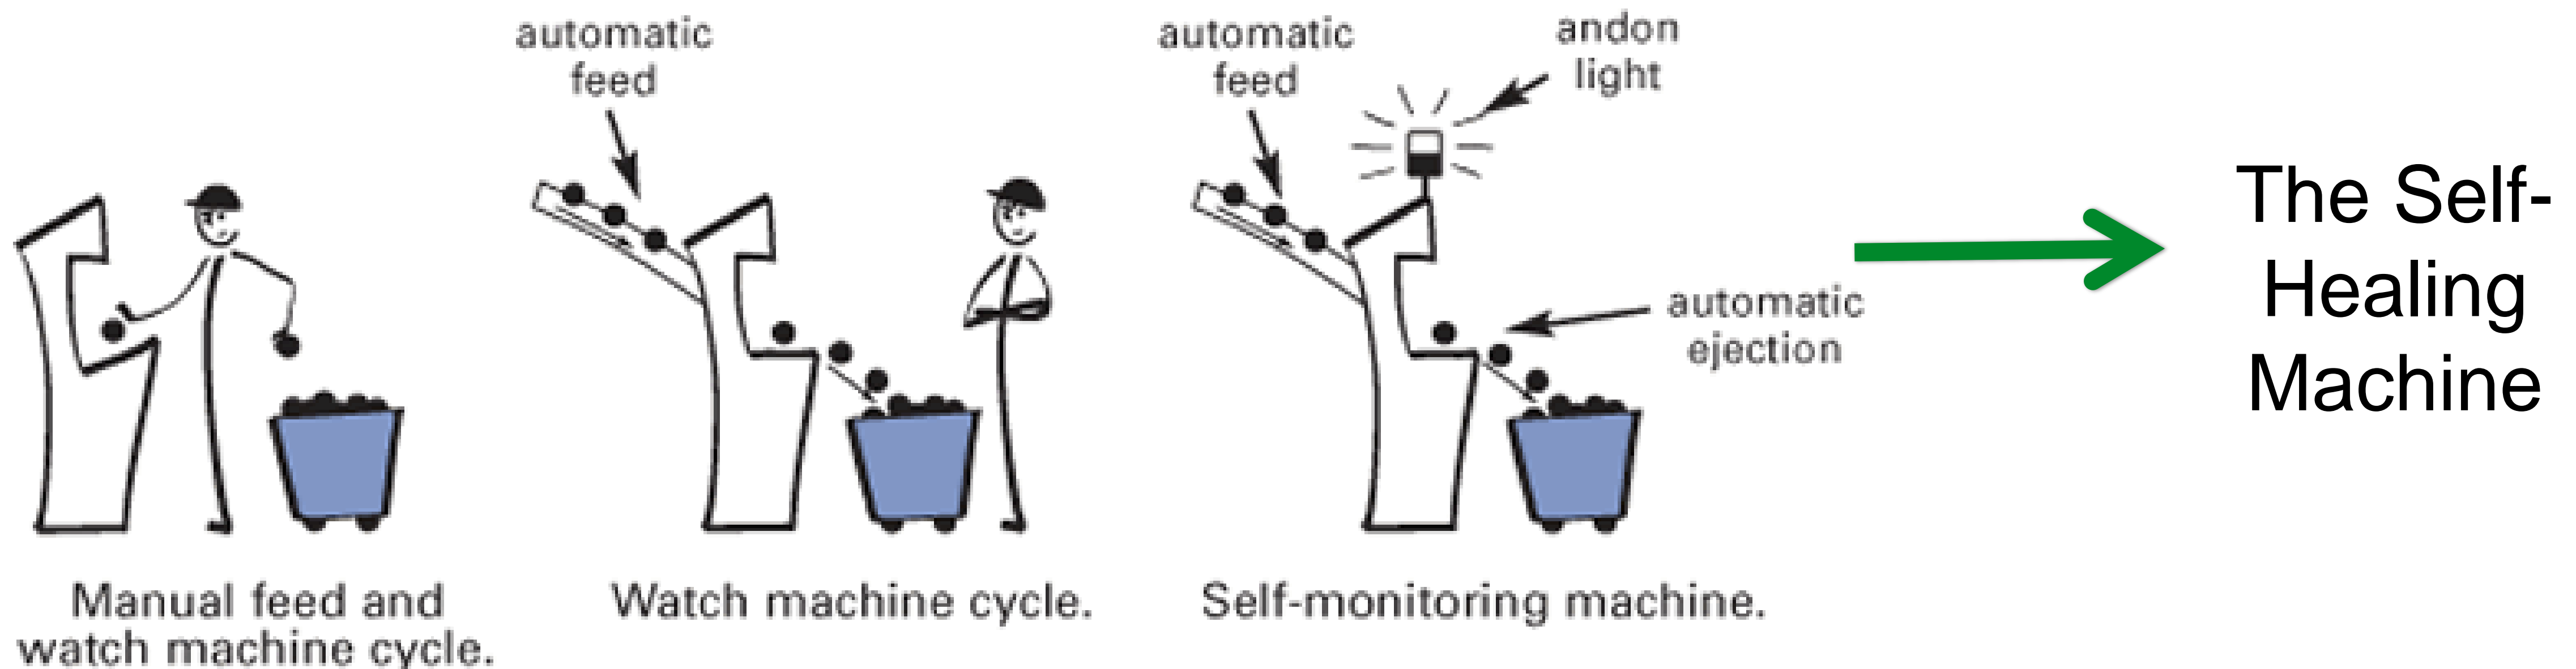

Mistake-Proofing

Automation (Jidoka)

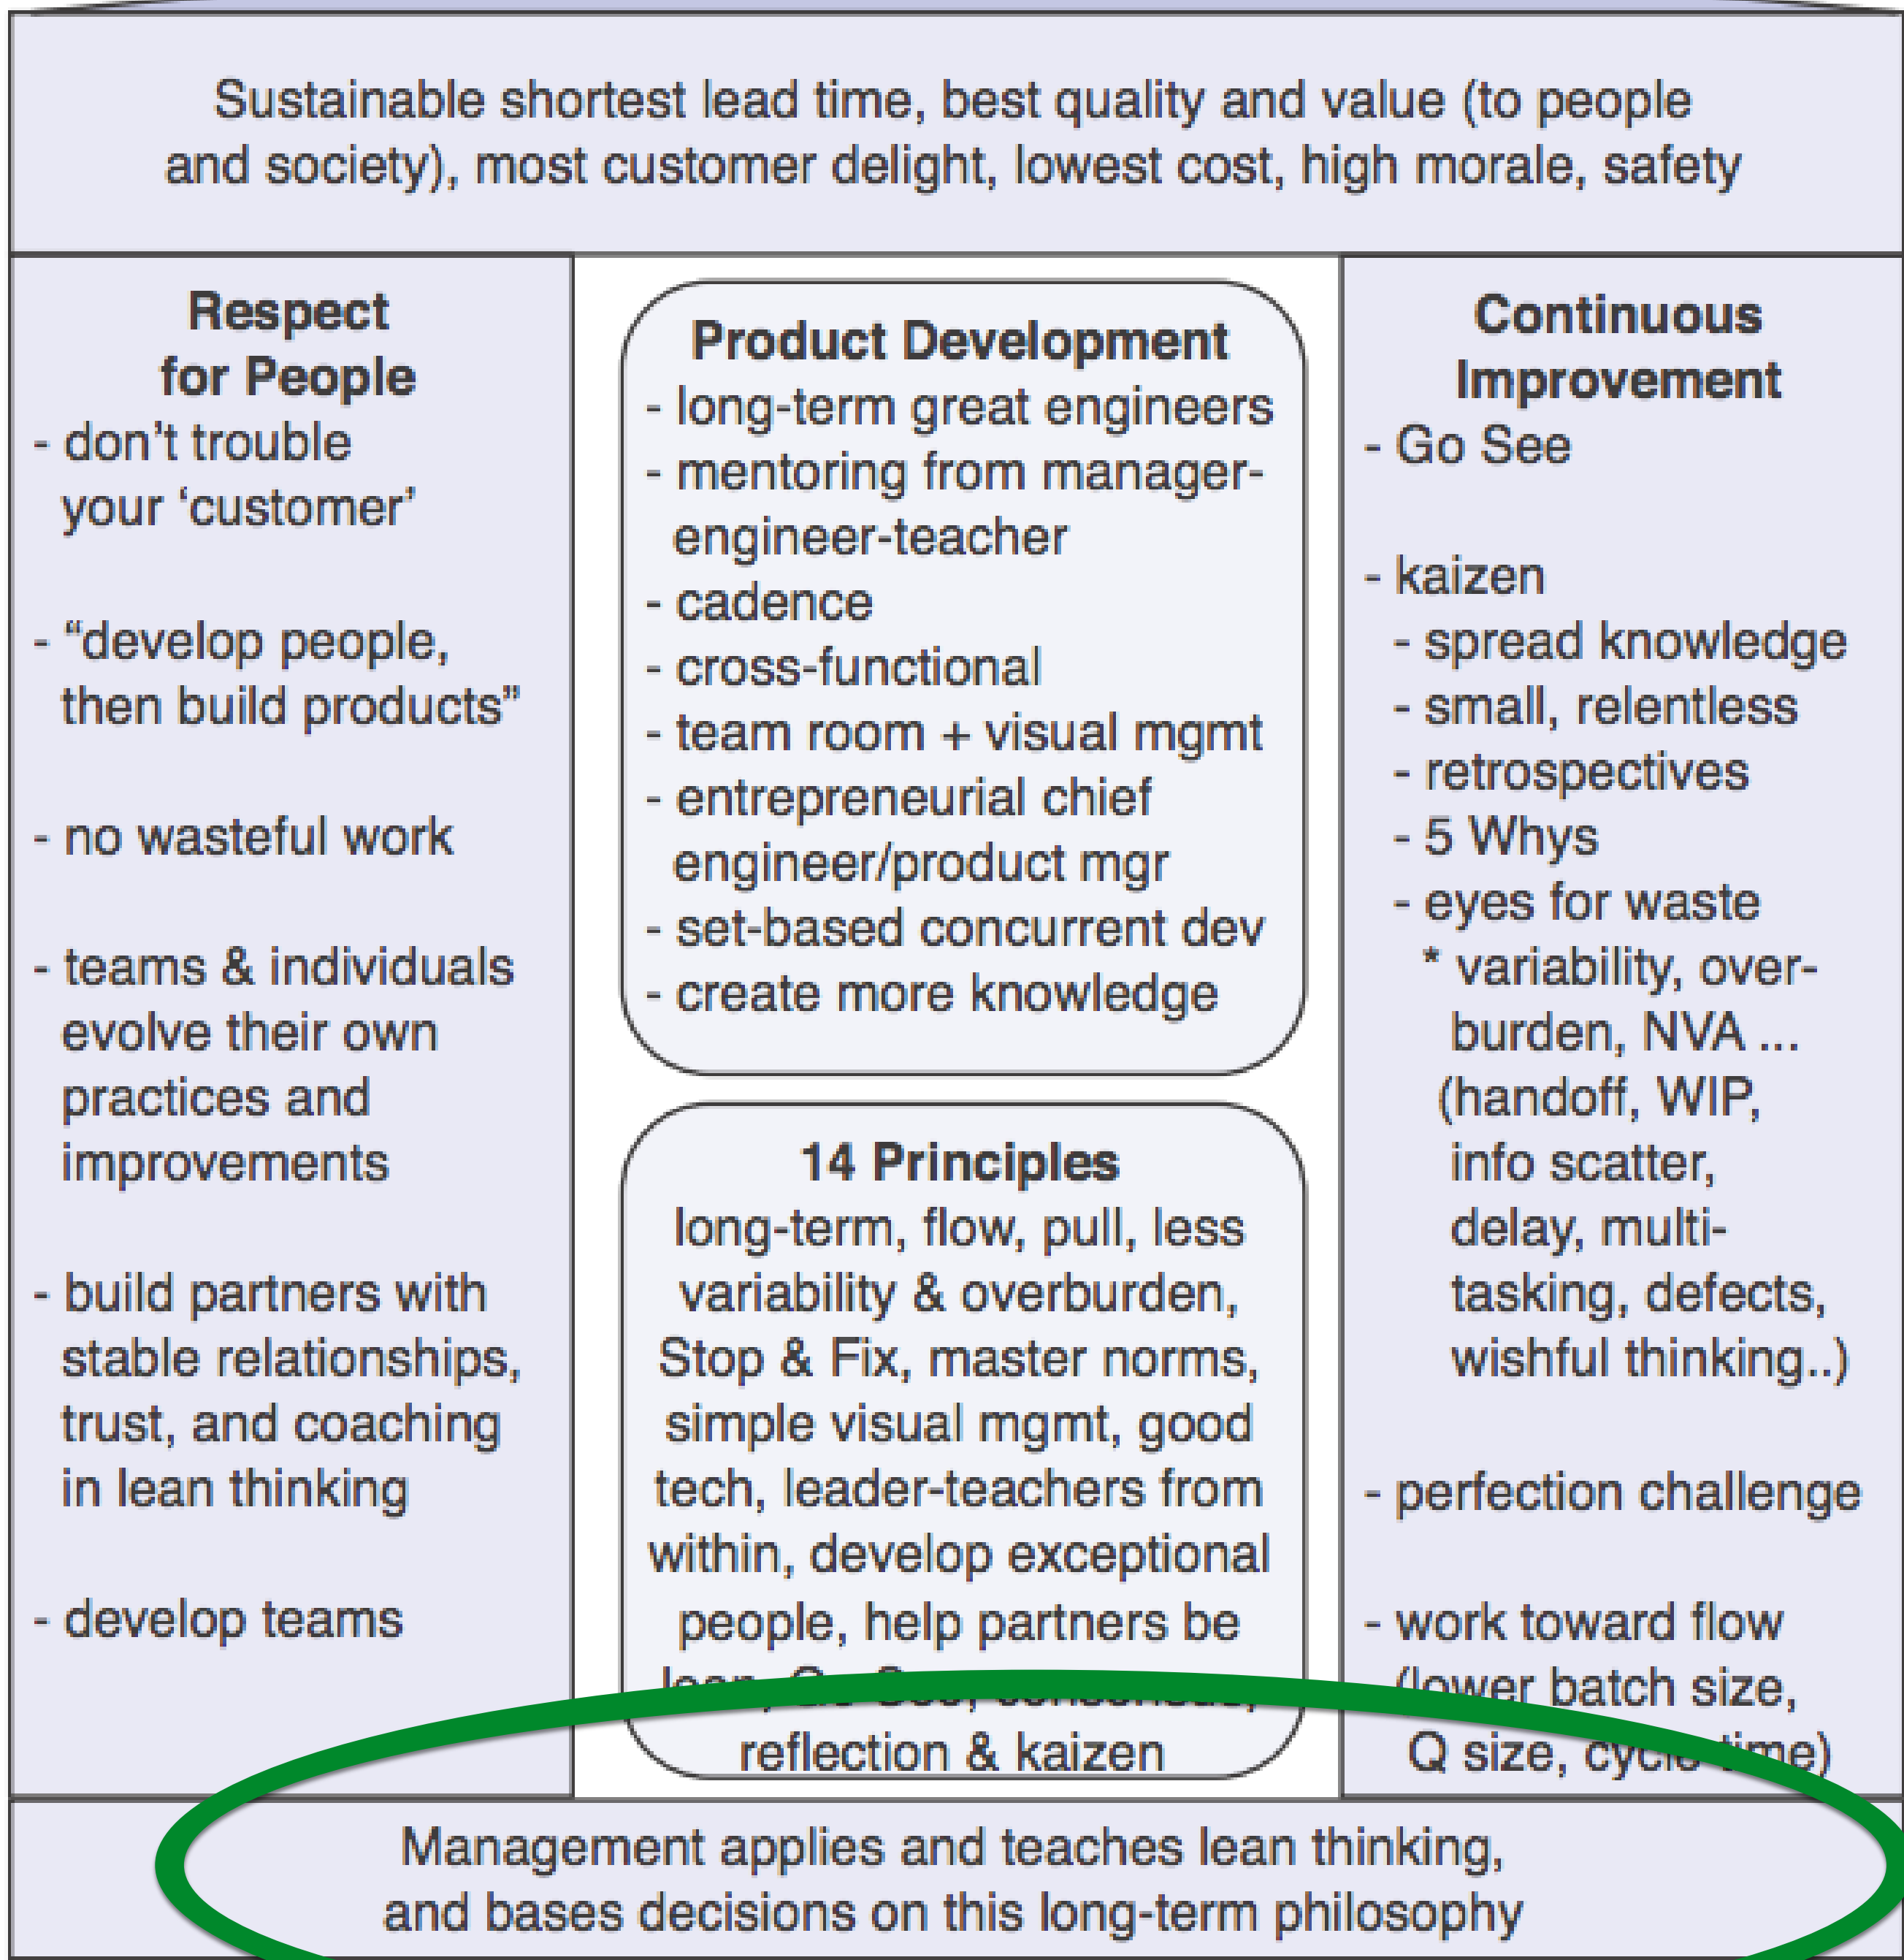

- “Intelligent Automation” or “Automation with a human touch”

The Evolution toward Jidoka

So, it's all about Lean

The House of Lean

Built on a foundation of Leadership

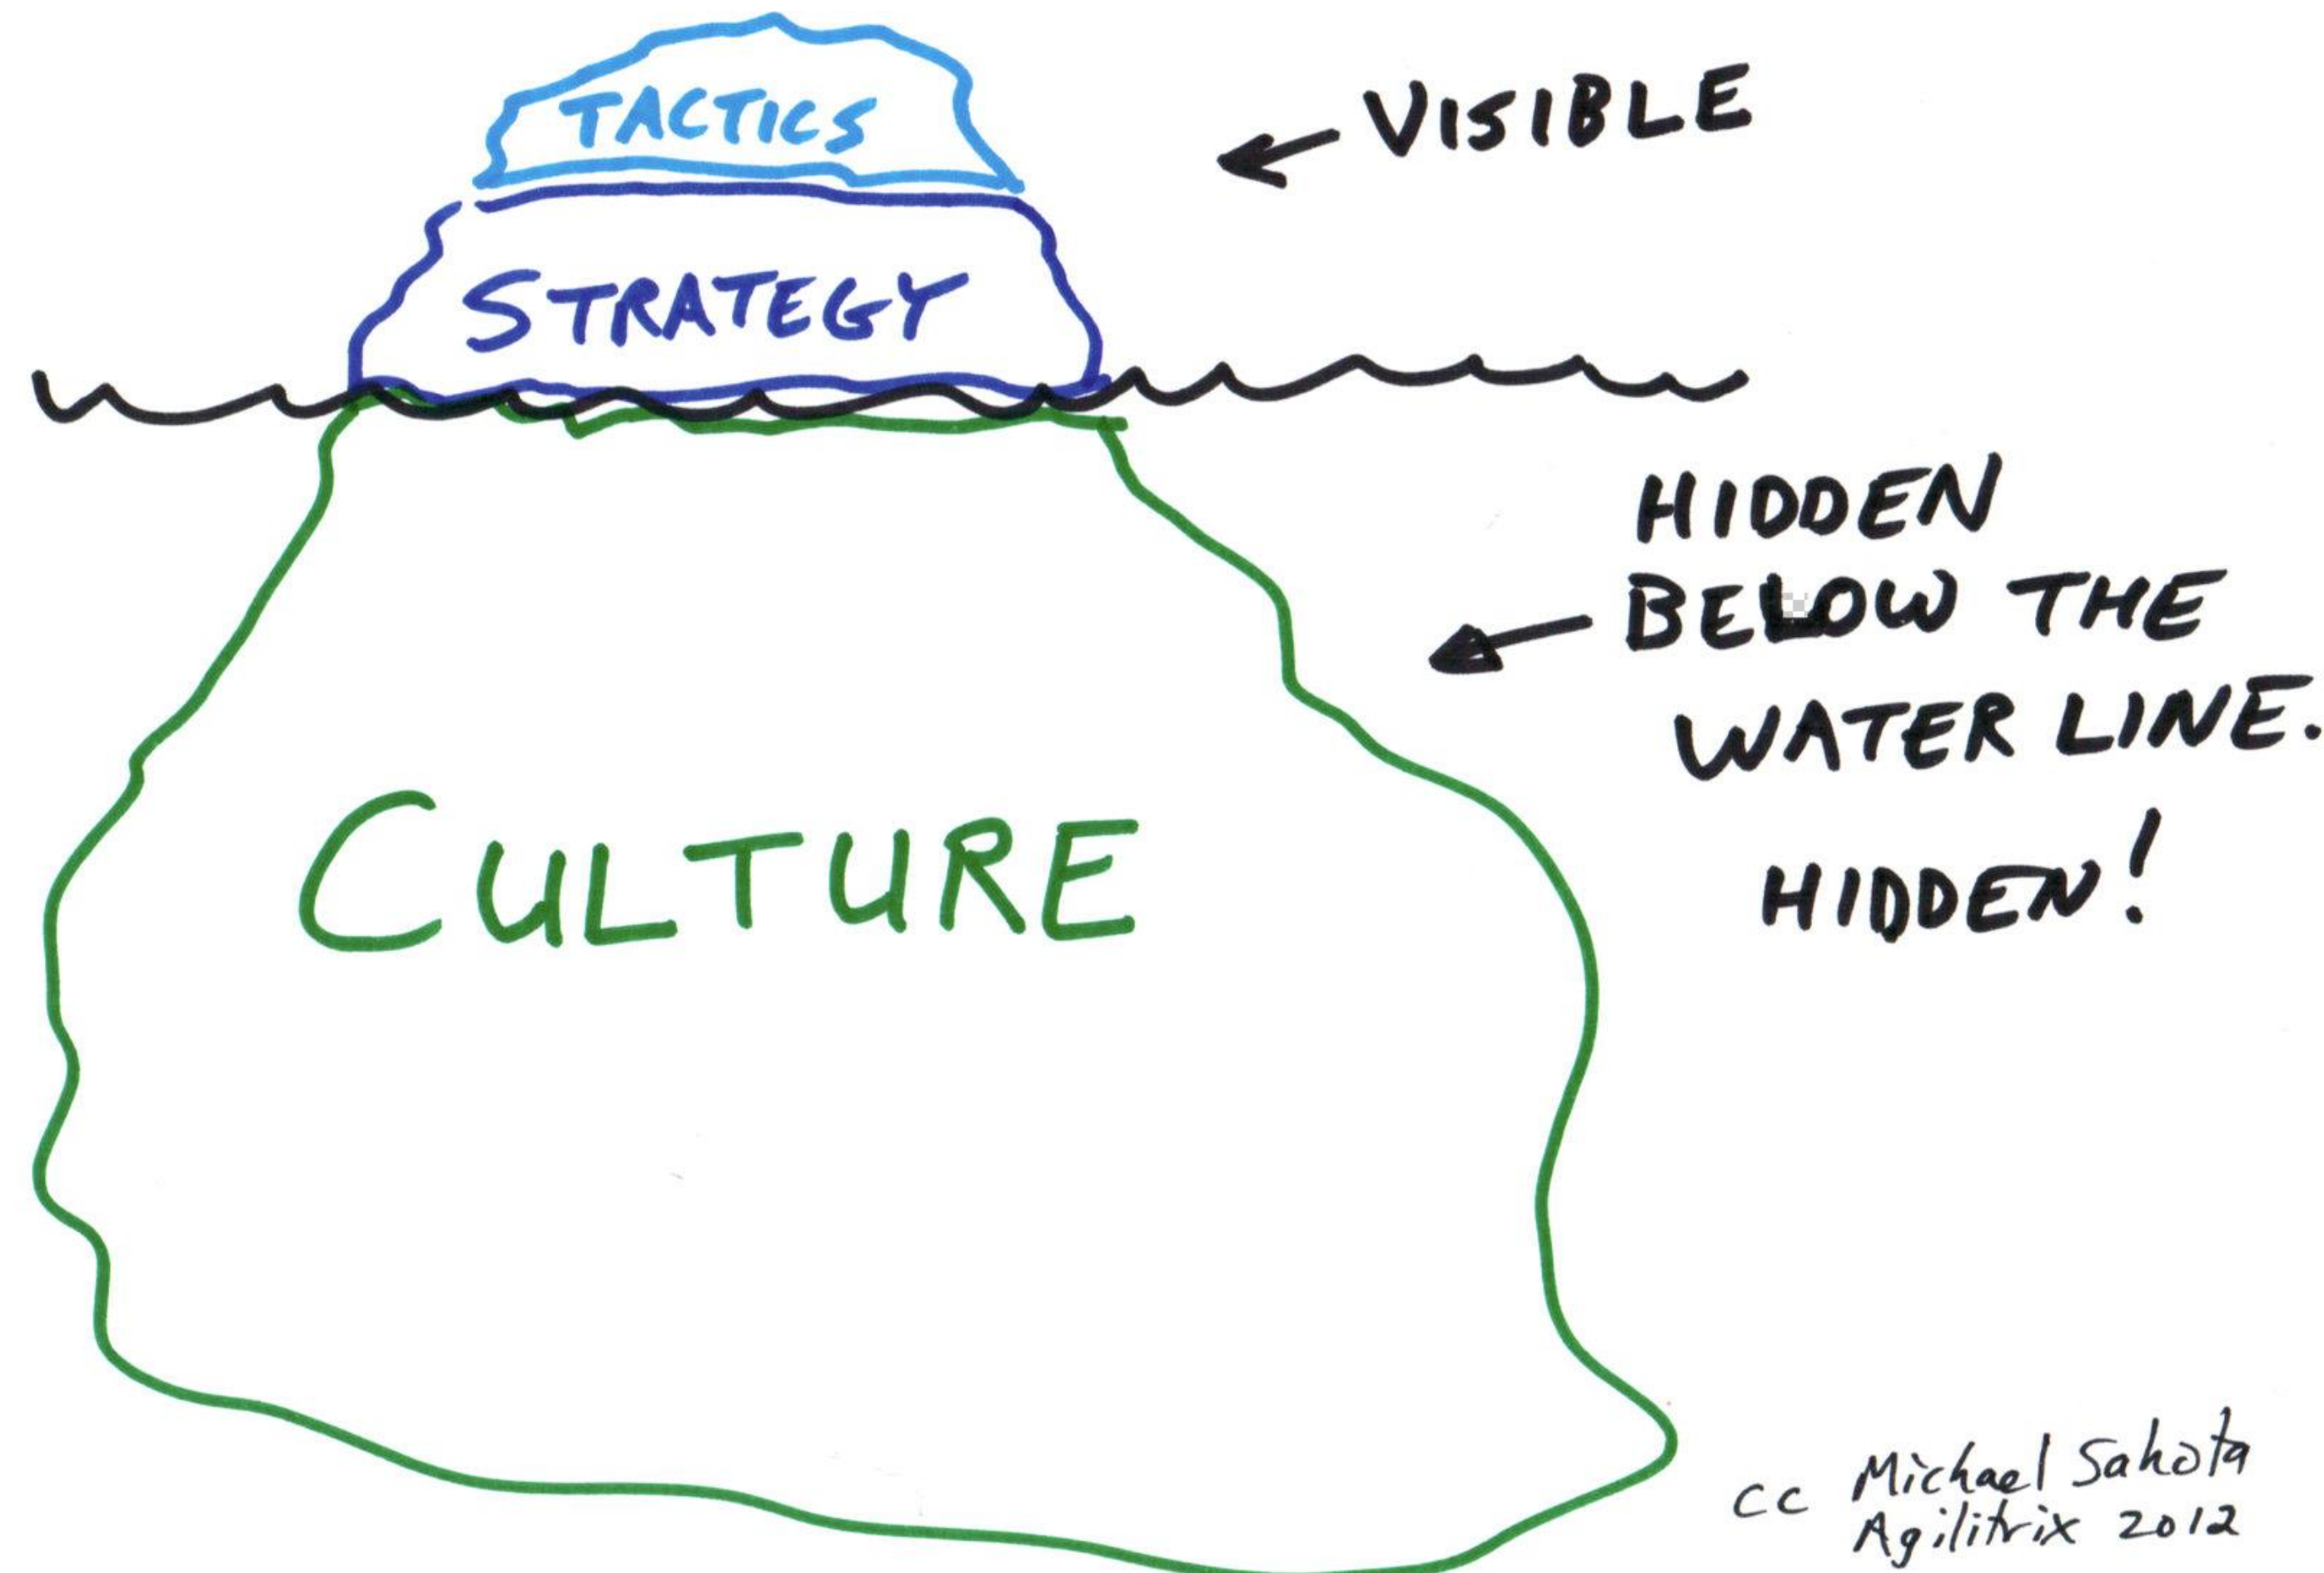

Lean Leadership

- Scalable Lean/Agile requires Leadership
 - Not just “permission” from Leadership
 - Not just “buy in” from Leadership
 - Leadership.
- Leadership must Lead and Teach Lean Thinking
- Scale down from the leadership, instead of trying to scale up from the team.

Lean Culture

- Sustainable Lean/Agile requires a cultural change
- Your culture will eat ~~your strategy~~ everything for breakfast

Lean Tools

- Use Lean Tools to teach Lean Thinking, and to reinforce Lean Culture
- “A Fool with a Tool is still a Fool”
- The tools don't make you Lean, or Agile, or effective at DevOps (not even LeanKit 😊)
- But they can be a key part of creating sustainability, and removing obstacles to change

Start with Leadership

- The initial goal of a Lean/Agile transformation effort should be to “convert” the Leadership
- Use initial Lean/Agile transformation results to provide evidence of positive change, and real economic impact
- Agree on an worthwhile outcome, and design an experiment

Leadership “Buy In”

- The ever-elusive “buy in”
- Find out what is important to them, and how that relates to the goals and strategies of the organization.
- Show your work. Show evidence of real economic impact, in furtherance of the company’s and the leadership’s goals.
- ***Use Lean Startup principles to find “product-market fit”***
- Negotiate. Prepare. “Don’t trouble your customer”.

Sustainability through Culture

- Sustainability of Lean/agile and the improvements you've made requires a cultural change
- This is true even a when there is a strong leader in place. Otherwise the changes will likely not live on past her tenure.
- How to change culture?
 - Start with Values
 - Communicate and re-enforce those values at every turn

Values

- Core Values
- Aspirational Values
- Table-Stakes Values

LeanKit's Values

Our values are **Lean** values: *Respect for people* and *Continuous Improvement*

Respect for people

- Develop people, then build products
- Focus on keeping the work moving, not keeping the workers busy
- Develop teams
- Don't trouble your customer
- We value collaboration, personal and professional growth, and work-life balance.

Continuous Improvement

- Challenge everything
- Embrace Change
- Be dissatisfied with the status quo.
Ask "why are we doing this?"
- Build, Measure, and Learn
- Small, relentless Improvements

Changing Culture

- Leadership must provide clarity on and over-communicate values
- Set “True North”
- Teach Lean tools to re-enforce Lean Thinking
- Go and See. Ask more than you tell.
- Take care what you reward and praise. Tell improvement stories.
- Build your own Lean Tools (like our FSGD) and build them into your “playbook” of tools.
- Culture follows structure
- “Only management can change the system” – W. Edwards Deming

Removing Obstacles

- Again, leadership must show the way
- Empower people to remove obstacles
- Be Intolerant of behavior, systems, and structures that don't match your values
- Do your systems and tools produce behavior that re-enforces your values?

Lean is a Journey

- Apply lean/agile principles to your attempts to affect a lean/agile transformation
- Short feedback loops
- Build, measure, learn
- Sit down with “customers” and “suppliers” and cooperate to create better flow of value
- “In God we trust. All others, bring data.” – W. Edwards Deming

So, don't stop believin'

Q&A

- What is the tie-in of Lean leadership, culture and tools to sustainability?
- How can you get leadership buy-in?
- How do we get our Lean culture to propagate at the business level instead of just in the IT department?
- How do you begin to build a culture of improvement?
- What has helped you most organizationally to create a Lean culture?
- What are the behaviors required from leaders in a Lean culture?
- How do you get leadership to feel ownership of promoting the change?
- How to overcome resistance to change?

Take the Lean Business Report Survey

presented by  **leankit**

- Share your experiences in learning, adopting or practicing Lean.
- Get an early copy of the Lean Business Report
- Complete the survey and be entered to win one of five \$500 Amazon gift cards.
