LeanKit

What if everyone on the team had Instant Project Visibility?

LeanKit: The Enterprise Kanban Tool

Teams need a shared tool to help them stay aligned and to visualize their work. With LeanKit, you can map processes on virtual whiteboards for a complete and transparent view of status, issues and updates. Track and manage a multitude of tasks and steps. Keep extended teams on the same page. Support continuous delivery with better communication, and improve your process over time with insightful analytics.

Process/Workflow View

Manage Your Work Visually

LeanKit's online visual management tool provides at-a-glance visibility for everyone in your organization.

• Due dates, priorities and issues highlighted with visual cues
• Bottlenecks and work impediments are identified easily
• Team members can clearly communicate work handoffs

*Visual cues show ownership and status*

Visualize Your Flow

LeanKit makes managing work as simple as drawing your workflow on a whiteboard and moving sticky notes to indicate status.
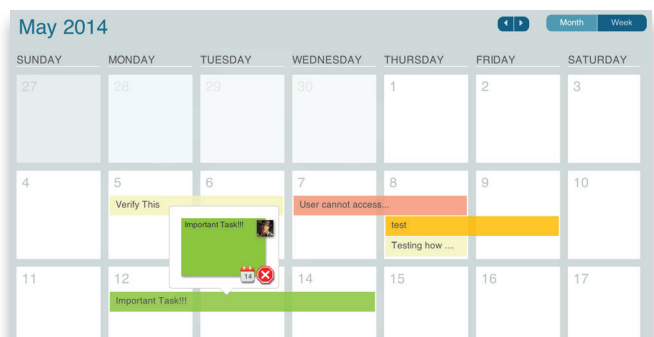

• Calendar view easily manages date-dependent work
• Processes mapped within minutes
• Flexible workflow view supports any evolving process
